Dear Jim:

Greetings. This is to acknowledge receipt of the reports "De-Melanizing Solutions As Attachments to Marijuana Urinalysis Testing Devices," and "The Forensic Aspects of Melanin in Marijuana Urinalysis Testing," as well as the draft of the patent application "An Improved Method for Detecting Tetrahydrocannabinol in Human Urine." These materials are of much interest to me, and I will examine them carefully.

I appreciate particularly your sending me these copies, because I was unsuccessful in obtaining the reports from the office of the Assistant Secretary of Defense for Health Affairs, when I contacted them earlier this year after you had mentioned to me submitting copies of these reports to the military authorities.

Sincerely yours,

Kurt M. Dubowski, Ph.D.
Distinguished Professor of Medicine
